EDUCATION

Chaitanya Bharathi Institute of Technology

B.E in Computer Science

Telangana, HYD

Nov 2022 – Aug 2026

EXPERIENCE

Full Stack Developer Intern

July 2024 – Sept 2024

Coder One

- Developed and implemented two projects using the MERN Stack, demonstrating proficiency in building full-stack applications
- Collaborated with the team to design and deploy scalable web applications, focusing on efficient backend development and responsive frontend design
- Gained hands-on experience in integrating various components of the MERN stack to create seamless user experiences and robust functionalities

Web Development Intern

Aug 2023 – Oct 2023

Internshala

- Acquired hands-on experience with HTML, CSS, JavaScript, React, PHP, and MySQL by working on a project that integrated all these technologies.
- Developed a comprehensive web application project, applying front-end and back-end development skills to build a functional and user-friendly product.
- Collaborated with team members to troubleshoot issues and ensure the project met quality and performance standards.

Team Leader

Oct 2023

Hackathon, Chaitanya Bharathi Institute of Technology

- Led a team to develop a project for a college hackathon, focusing on innovative solutions and effective project management.
- Presented the project to a panel of judges, showcasing the functionality and creativity of our solution.
- Secured 1st position in the hackathon, demonstrating strong leadership and technical skills.

PROJECTS

Alumni Tracking System / MERN Stack

- Developed an interactive platform where Alumni and current students can connect and engage.
- Implemented an admin verification system to authenticate alumni credentials by cross-referencing the college database.
- Enhanced communication and networking opportunities within the college community.

PG-Life / HTML, CSS, JavaScript, React, PHP, MySQL

- Built a full-stack application using HTML, CSS, JavaScript, React, PHP, and MySQL for finding PGs or hostels in various cities.
- Designed distinct login and signup pages for property owners and users searching for accommodations.
- Implemented features to display amenities and detailed information about each property, enhancing user experience.
- Integrated a robust search and filtering system to help users find properties that match their specific requirements quickly and efficiently.

Chat App / MERN Stack, Socket.io

- Developed a real-time chat application using React for the frontend and Node.js with Socket.io for the backend.
- Implemented MongoDB for storing user data and chat history, ensuring persistent communication between users.
- Integrated user authentication and real-time messaging, allowing users to securely login and engage in conversations.
- Designed an intuitive user interface with responsive layouts, enhancing accessibility and usability across different devices.

TECHNICAL SKILLS

Languages

Python, Java, JavaScript, MySQL, HTML, CSS

Frameworks

React, Node.js, Express.js, MongoDB

Developer Tools

Git, GitHub, VS Code, Visual Studio, IDE

Libraries

pandas, NumPy, Matplotlib
